SUMMARY

Aspiring Web Developer with a strong interest in JavaScript, Node.js, and WebRTC. Skilled at building efficient full-stack applications and solving practical problems. Also managing a Cyber Café, gaining experience in responsibility, technology handling, and customer support.

WORK EXPERIENCE

Cyber Café & Online Services (Self-owned)   2021 – Present
– Provided online government services including form submissions, pension forms, and money transfers.
– Built customer trust with reliable digital support and efficient service operations.
– Gained hands-on experience managing computers, internet troubleshooting, and client handling.

PROJECTS

FlashDrop (File Transfer App)   [GitHub Link]

WebRTC + Socket.IO based P2P file transfer app with LAN and TURN server support. *Developed with guidance from ChatGPT as a coding assistant to learn WebRTC and large file handling.*

PDF Data Processing Tool   [GitHub Link]

Node.js backend project using Express, Canvas, and ImageMagick for extracting structured data from PDFs and rendering formatted images. *Created with ChatGPT's support for learning backend logic and PDF/image processing.*

TrueLink (Deep Link Opener)   [GitHub Link]

A tool that forces supported URLs (e.g., YouTube, WhatsApp, Instagram) to open directly in their respective native apps instead of the web browser. *Built with guidance from ChatGPT while learning about deep linking and URL handling.*

EDUCATION
